

## ENVIRONMENTAL MANAGEMENT POLICY

### Scope

BlueSky Solutions Ltd are committed to reducing the environment impact and continually improving our environment performance as an integral part of our business strategy and operating methods. BlueSky will continuously work and investigate options to reduce the consumption of energy in its storage and manufacturing processes. It is our obligation to enhance our environmental performance, fulfil our obligation to compliance and achieve our environmental objectives.

It is therefore our commitment to:

- Reduce environmental impacts of its activities, products, and services
- Provide a framework for setting environmental objectives
- A commitment to the protection of the environment, including prevention of pollution and other specific commitments relevant to the context of the organisation
- Protect the environment including sustainable resource use
- Challenge climate change mitigation and adaptation, and protection of biodiversity and ecosystems.
- Have a commitment to fulfilling our compliance obligation and a commitment to continual improvement and enhance environmental performance.
- Continually improve our environmental performance by setting measurable objectives and targets and reviewing their performance.
- Work with customers to reduce the environmental impacts of our products.
- Comply with relevant regional and national environmental legislation to reduce the impact of global environmental forces.
- Improve the environmental impact of our operation by reducing energy use and minimising waste.
- Provide information and training to our employees, applicable to their role, on the environmental effects of our activities, and enlist their support in improving our environmental performance.
- Make our Environmental Policy available to customers and other interested parties upon request.

BlueSky will continuously work and look for options to reduce the consumption of energy in its production process. This includes looking at more energy efficient equipment, installing devices that regulate highs and lows in energy consumption, consciously looking at temperature settings and making use of available sources as outside air to avoid unnecessary cooling and heating.

BlueSky will look carefully at selecting materials for its production process that are environmentally friendly. The company will be actively engaged in recycling matters, both for virgin and PCR materials. The policy and objectives are reviewed at the Senior Management Review Meeting annually.
