

Seamless Export Solutions to Europe

with BlueSky

BlueSky

At BlueSky, we understand that navigating the complexities of international trade can be daunting, especially in the post-Brexit landscape. That's why we've worked to streamline the process and alleviate the common hurdles associated with buying from the UK.

Our approach ensures that your business benefits from:

1 Duty-Free Advantage

There will be no additional duty applied to your orders, despite sourcing from the UK, making financial planning simpler and more predictable.

2 Simplified Customs Process

We've cut through the red tape for you. Our method reduces the paperwork required for customs clearance, allowing for a smoother, faster, and less burdensome administrative process. This efficiency is key to keeping your operations lean and agile.

3 Currency Flexibility

To further ease the buying process, we offer the option to trade in your own currency. This not only minimises administrative hassles but also shields you from potential foreign exchange risks, ensuring stable and predictable pricing.

4 Supply Chain Consolidation

With BlueSky, you have the option to enhance efficiency and reduce logistical complexities. By centralising your purchasing, you can achieve better control over your inventory, improve lead times, and potentially unlock savings.

**Our commitment to
facilitating seamless
exports to Europe stems
from our dedication to
supporting your
business's growth and
success.**

**SEAMLESS
EXPORT
SOLUTIONS**

Old vs New

Current Method

1

Order placed with BlueSky

2

Goods shipped from the UK
